Hi Brian,

I've attached a map of the area showing the 100yr flood plain extent as well as soil map unit boundaries from SSURGO data. The website that I used for the soil data is the Web Soil Survey provided by USDA NRCS
<http://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx>

This is the first time I have used it, and it's really a handy tool. I was able to zoom-in to the Redfish Bay area, view a map/list of the soil units in the area, then download the data. Really nice!

Let me know if you need something different on the map or in another format. I'll be glad to help!
Melody

Melody

Do you know if you can obtain soil survey maps for the Falcon Site area? Also do you have access to flood plain maps for the area. In particular, the 100 yr map would be useful.

Thanks

Hi Brian, I've attached a copy of the 1954 USGS topo for the area around the Falcon Refinery and barge docks.
The docks would be located along the shore north of the word REDFISH in "REDFISH BAY".
